30 September 2026

Dear Parents and Carers,

We would like to make you aware that we have been informed of one confirmed case of measles within our school community.

The family involved is following the appropriate health guidance and their child will remain away from school for the required exclusion period.

Whilst there is no requirement to notify parents of a single case, we feel it is important to keep our school community informed and ask families to be extra vigilant for any signs or symptoms of measles.

Symptoms can include:

- A high temperature
- A cough, runny nose or sneezing
- Sore, red or watery eyes
- A rash that usually appears a few days after the cold-like symptoms begin

If you suspect your child may have measles, please contact your GP or NHS 111 for advice before attending a healthcare setting.

The MMR vaccine is the best protection against measles. If you are unsure whether your child has received their vaccinations, please contact your GP surgery. If you are pregnant or have any questions about measles and your family's health, your GP or healthcare professional will be able to provide further advice and support.

Thank you for your support.

Yours sincerely

Charlotte Beresford
